implant clinic

WHAT IS FULL MOUTH DENTAL IMPLANTS?

The Full Mouth Dental Implants procedure restores your natural smile and oral function in a single day by placing a complete row (upper and/or lower) of permanent, natural looking and feeling, functional teeth using 4-6 dental implants. Thereby restoring function and confidence.

We use the Chrome GuidedSMILE system which was developed for dentists and patients who desire a pre-planned, predictable guided solution for teeth-in-a-day implant surgery, and in some cases in as little as 3 hours.

**Smile with confidence
with Infinityblu.**

Full stability, complete confidence,
long-lasting and natural-looking results

HOW IT WORKS

We use a guided treatment, for precision and accuracy during surgery. This results in a less invasive procedure, a faster recovery, and more predictable and long-lasting outcomes with transforming results. This allows you to leave the surgery - on the same day - with a functioning and confident smile, and an amazing long term result.

Unlike traditional same day procedures Chrome guided allows for:

- Significantly less surgical time compared to traditional teeth in a day methods
- Significantly reduces the need for Bone Grafting surgery
- A comfortable, more predictable and safer surgical experience
- Reduced swelling and discomfort after surgery
- A smile that looks, feels and functions like natural teeth
- Fewer visits to your dentist
- Faster visible results
- Fully fixed functional teeth; no more uncomfortable dentures
- Increased confidence in your smile
- Improved appearance
- Improves your ability to eat and chew food that you have struggled to with dentures
- Easier maintenance
- Fantastic long term results

HOW DO I KNOW FULL MOUTH DENTAL IMPLANTS IS FOR ME?

- If you are about to lose your teeth
- If you are tired of dentures
- If you want a completely new smile design
- If you are not a candidate for traditional implants
- If you need high quality fitted provisional teeth

If you are tired of the pain, discomfort or lack of confidence resulting from wearing dentures, or you are not a candidate for traditional implants, full mouth dental implants is the perfect and most natural solution for your smile.

FULL MOUTH DENTAL IMPLANTS TESTIMONIAL

“Before the surgery I wasn’t happy with my teeth. I had a real dread of dentures and didn’t want them. I discussed this with my Dentist and we talked about the procedure. I was a little apprehensive at first but felt comfortable when everything was explained to me.

On the surgery day I was a little nervous but the staff were so nice and friendly. Over the years I didn’t smile much and wasn’t confident having photographs taken, but now I have started smiling and laughing. I have more confidence, and my husband is really pleased too.”
